There are many stories about this legend, but the most popular is the one is the story of Dragosh, who decided to cross the eastern mountains. He took with him three hundred hunters and his favorite dog, Molda. By chance, on the way they met a wild bull - a bison. Chased by the dog, the animal fell into the river being killed by the hunters' arrows. The manifestation of the hunting instinct made Molda jump into the water, where she died.
